

LOCAL IDENTITIES and URBAN MORPHOLOGY RESEARCH

ISUF Network round table organized by ISUFItaly

Chair_Giuseppe Strappa
Coordinator_Alessandro Camiz

Wednesday, June 18th (6:30 PM/7:30 PM CET)
Torino, Castello del Valentino, Room 1V

The Isuf local networks are growing in number and quality of activities. The annual reports sent by the presidents of the different associations in 2025 prove the great interest of the members in organizing new tools for the dissemination of the results of their research, and how the different investigations have dissimilar characteristics linked to the different cultural areas. The specificity of the research topic often requires dedicated tools for reading the built landscape stimulating original and innovative experimentations. Precisely for this reason, Isufitaly has organized a round table to make known and discuss, through brief presentations, the different, specific research conditions, methods, topics of the five networks in formation that will soon be added to the Isuf network family.

S. Muratori, Etrurian territorial system, municipality of Marsiliana. Unpublished drawing, undated.

PROGRAM

6.30 p.m.

- Introduction

Giuseppe Strappa

6.35

- Arab Network

Aliaa Al Sadaty

- Indian Network

Arathy Gopal

- North American Network

François Racine

- Oceania Network_

Francesco Mancini

- South S. Africa Network

Michelle le Roux

7.10

- Discussion coordinated by

Alessandro Camiz

All the Isuf members are
invited to take part in the
discussion
